

FREE SAMPLE • CLASS FINGERPRINT TREE

Our Class Fingerprint Tree

The 15-print tree with name lines and the ink guide. The full kit adds trees for 25 and 35, numbered trees with a key, a 16 × 21 in poster and an 18 × 24 in file.

WHAT'S INSIDE

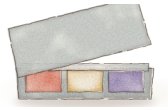

- Ink guide
- Tree for 15 with names

US LETTER • PRINT AT 100% • STICKER DOTS WORK TOO

BOBOTEMP

Before You Print

One fingertip, one oval, one light press

YOU WILL NEED

- A washable, non-toxic ink pad or finger paint labelled safe for children's skin (two or three leaf colors).
- Damp wipes or a bowl of soapy water and a towel, and scrap paper for a test press.
- A fine dark marker for names or numbers, after the prints dry.

MAKING THE LEAVES

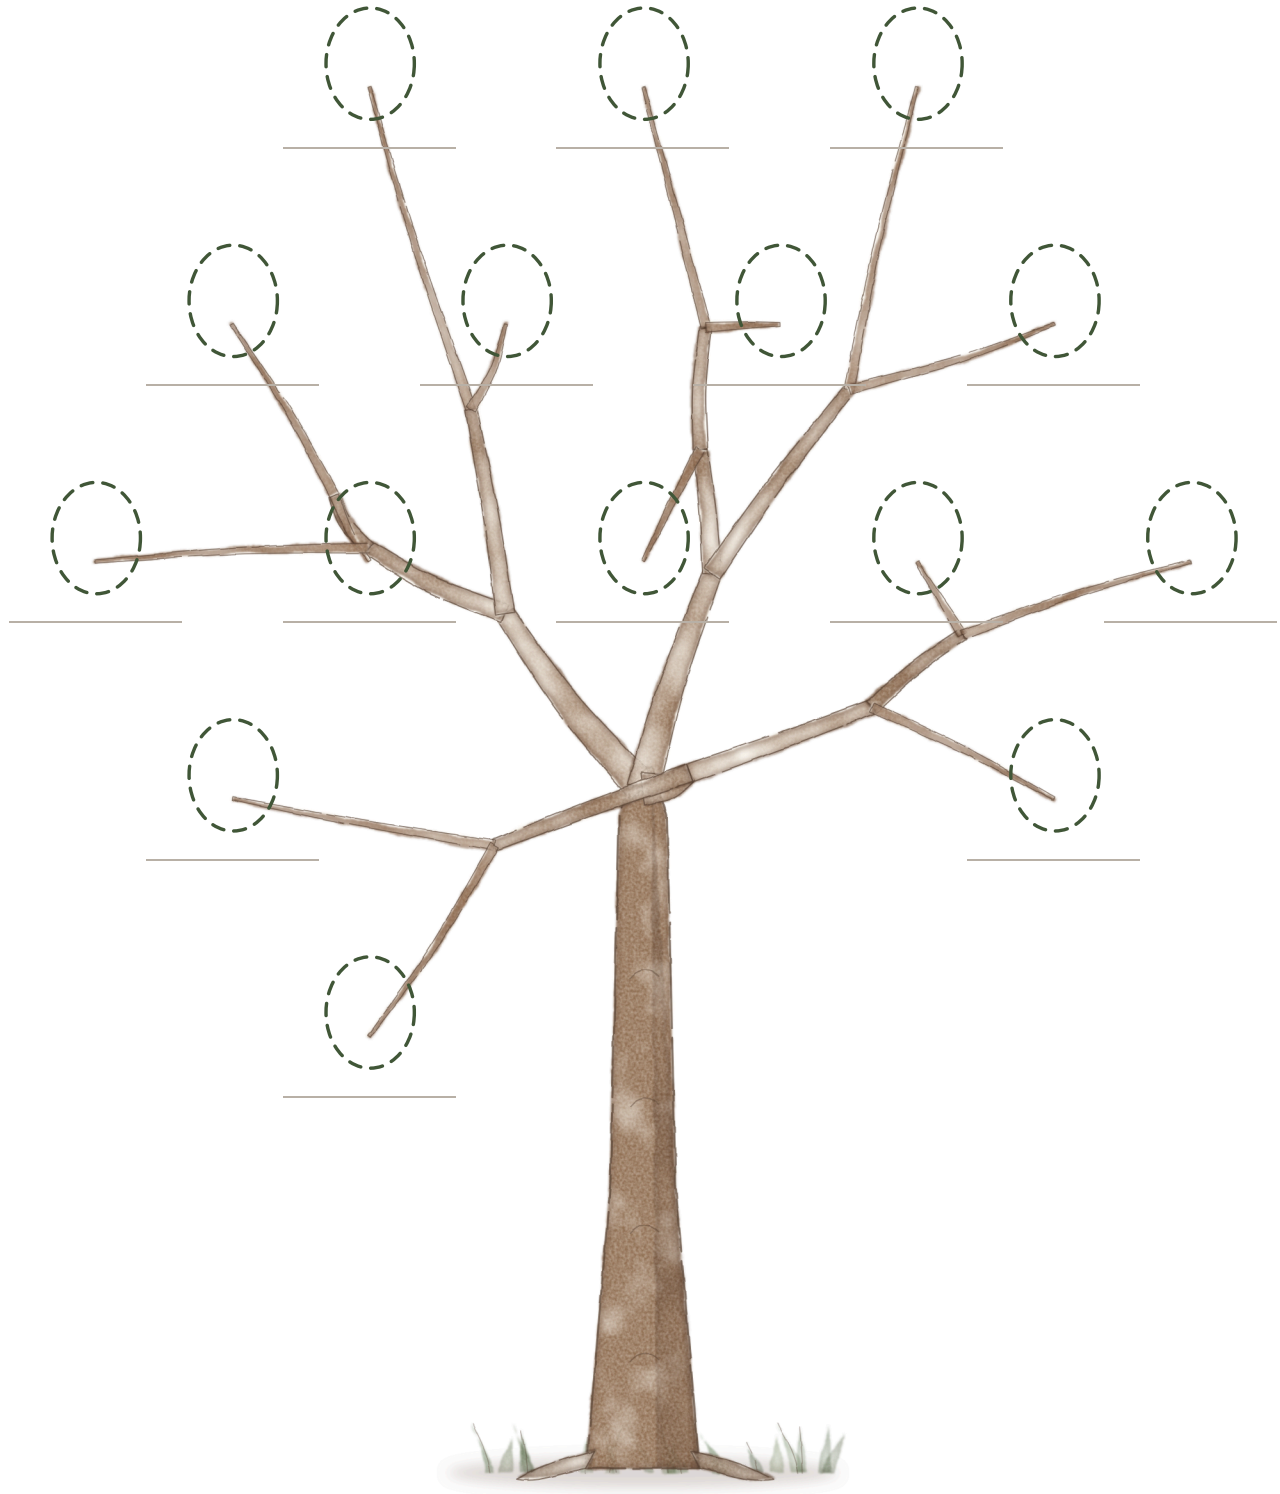

- 1 ONE FINGER, ONE PRESS**
Press one fingertip on the pad, then straight down inside a dashed oval — no rolling. Lift straight up.
- 2 TEST FIRST**
One press on scrap paper takes off extra ink; a blob means too much.
- 3 WIPE BETWEEN COLORS**
Wipe the finger before changing color so leaves stay clear.
- 4 LET IT DRY**
Wait until every print is completely dry — it depends on the ink and how thick the press was — before anyone writes a name or number or stacks the pages.

SAFETY AND NAMES

Use only washable, non-toxic ink or finger paint labelled safe for children's skin, with a grown-up watching. Keep it away from faces and mouths, wash hands with soap and water straight after, and let any child who dislikes the feel use a sticker dot instead. Names are optional: first names or initials, only if your school and the families agree.
