Gauge Swatch Record

Knit to the pattern's gauge, not its needle size

Measure your swatch before washing and again after washing and drying it completely, the way you will treat the finished piece; knit to the gauge that matches the pattern after washing. Count stitches across the middle of the swatch, away from the edges, over at least 4 in (10 cm).

ESTIMATED SECTION WIDTH OR CIRCUMFERENCE

CHANGE NEEDLES?

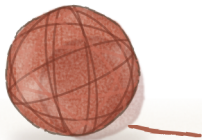

Estimated section width or circumference (in) = total stitches in that section ÷ your washed-and-dried stitches per inch, in the section's stitch pattern. Measured in cm? Inches = centimetres ÷ 2.54.

This journal records your own projects. It contains no knitting patterns; keep your patterns where you bought or found them and note the source here. Care notes come from your yarn’s ball band.
